Greater Saskatoon Chamber of Commerce
“Celebrating over 100 years of Business Building Saskatoon”

President's Report

Dear Chamber Supporters,

It appears that there is a growing sentiment in Saskatoon that “the sky is falling” on the economic growth that our city and province have seen in recent years. There is no doubt that there will be challenges ahead for our province; but it is an oversight to assume that the good days are behind us. While there may have been a slowdown in the tremendous growth that Saskatoon has seen in recent years, it is important to remember that we are still growing and moving forward. As a recent report from KPMG highlights, Saskatoon is rated as the 2nd most attractive location for business in the Midwest US/Western Canada. This means that future investment prospects for Saskatoon are very good.

With recent years of high growth levels, it can also be tempting to fall into a mindset of complacency. Fluctuations in the global commodity markets reinforce our chamber’s message that we must remain steadfast in our commitment to growth through smart business policy.

Saskatchewan provides endless opportunities for those who are willing to apply themselves and bring value to our economy. With more natural resources and farmland per capita than anywhere else in the world, our province is fortunate to have what the world needs; energy and food. With growing numbers in business investment and continually strong job numbers, Saskatchewan has all the tools to continue a pattern of sustainable growth into the foreseeable future.

The sun may not be shining quite as brightly, but the sky is certainly not falling.

Tracy Arno
President 2013-14

The committee is comprised of youth entrepreneurs, professionals and post secondary students who are all passionate about voicing their opinions, and influencing change to make the city of Saskatoon all that it can be. In addition to focusing on advocacy topics, the Knowledge and Youth Development Committee also facilitates the Student Apprentice Program and the New Business Owners Club (NBOC). Led by the Knowledge and Youth Development Committee, The Student Apprentice Program places two University students on each of the Chamber of Commerce 12 committees, dependent on their interests. These students are then able to network with many business owners and professionals around Saskatoon, as well as attend committee events. The Student Apprentice Program slowly introduces students who have not had the opportunity to real business. Engaging youth into the Chamber early gives students a way to easily market their future business or self by attending networking events and Chamber committee meetings.

My favorite thing about Saskatoon:
"It is a great place to raise a family. The community is entrepreneurial and growing but it still maintains its sense of community through the involvement of many of its leading businesses and individuals. People willingly give back with no expectation of a personal return on that investment other than the expectation that they will share in the benefits that flow from making the community a better place for everyone in it. I love the positive, generous and optimistic energy of this city and the fact that even the most successful individuals who call Saskatoon home still seem to be guided by a functioning moral compass. If it takes a community to raise a child – and I still think that it does – I can't think of a better environment for my children to grow up in."
